

A Community Safety and Security Programme

(Anti- Bicycle Theft Project)

A COMMUNITY SAFETY AND SECURITY PROGRAMME (CSSP) BY

✓ **Secure your bicycle with a good quality padlock**

✗ **Be considerate – Do not reserve an empty rack; padlock will be removed without notice**

Tampines estate was introduced as the first cycling town in Singapore where cyclists are allowed to ride their bicycles on footpath. With the increase in the number of cyclists and bicycles, Changi NPC and Tampines NPC and Tampines Town Council came up with this initiative to curb bicycle thefts.

A study was conducted and it showed that bicycle theft cases reported usually occurs at the bicycle bays located at void decks though owners have secured their bicycles with chain locks.

To curb the bicycle theft problem, the design of the bicycle bay will provide a better security feature for bicycle owners. Together, Changi NPC, Tampines NPC and Tampines Town Council came up with a simple design that can reinforce the security feature of the bicycle bay.

Reinforced Security Feature using a Metal Bar

Blocks that have installed the security features
